Css Grid Cheatsheet

by @alber70g

```
<div class="site">
  <header />      ←—Item—
  <main />
  <aside />
  <footer />
</div>
```

Line — Cell — Gap — Gap — Track — Area — Line — Track
	1fr	auto	1fr
1fr	Logo	Title	Icons
1fr	Nav	Nav	Nav
auto	none	Main	none
1fr	none	Footer	none

Steps

For each screen size:

1. Define `grid-template-columns` and `grid-template-rows` for main container
2. Define `grid-template-areas` for main container
3. Tell each class in which area it has to be with `grid-area`

```
.site {
  display: grid;
  grid-template-columns: 1fr auto 1fr;
  grid-template-rows: 1fr 1fr auto 1fr;
  grid-template-areas:
    "logo title icons"
    "nav nav nav "
    "none main none"
    "none footer none";
}
```

```
.nav {
  grid-area: "nav";
}
.footer {
  grid-area: "footer";
}
```
